Résumé (+ Use/Advantage): J09124453 Drug for skin external application comprises (a) trehalose and/or its derivative, and (b) at least

one of plasma, plasma protein and plasma substituent.

The drug preferably additionally contains triglycosaccharide. USE |- The drug is a hair

cosmetic. ADVANTAGE - The drug improves moisture reduction of scarf skin and horny layer due to dryness by ageing and weather, damage by UV light, burn and

sunburn, softness and gloss of skin, and skin cell activity. In an example, a composition comprising trehalose (1.0 pt.wt.), dextran (1.0 pt.wt.), collagen

(4.0 pts.wt.), sodium chloride (0.2 pt.wt.), methyl paraben (0.3 pt.wt.) and purified water (41.0 pts.wt.)

was dissolved at 40 degrees C and added with a solution of guar gum (0.03 pt.wt.) in purified water

(52.47 pts.wt.) at 80 degrees C to give a cosmetic

pack. (Dwg.0/0)
